Supplemental cash flow information - Note 9

The accompanying notes are an integral part of these condensed consolidated interim financial statements.

1. Nature of Operations and Going Concern

Altair Resources Inc. (the "Company") was incorporated under the provisions of the Company Act (British Columbia) on November 17, 2005. The Company is a publicly listed company with its common shares listed on the TSX Venture Exchange ("TSXV") under the symbol "AVX" and the Frankfurt Exchange under the symbol "90A". The Company's head office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia V6E 3V7 Canada.

The Company is a junior mineral exploration company currently engaged in the acquisition and exploration of mineral properties. The Company's ability to continue as a going concern and the recoverability of the amounts capitalized as exploration and evaluation assets are dependent upon the ability of the Company to raise additional financing in order to complete the acquisition, exploration and development of its mineral property interests, the discovery of economically recoverable reserves and obtaining future profitable production or proceeds from disposition of the Company's mineral properties. As a mineral company in the exploration stage the ability of the Company to complete the acquisition, exploration and development of its mineral property interests will be affected principally by its ability to raise adequate amounts of capital through equity financings, debt financings, joint venturing of projects and other means.

The Company has a history of losses with no operating revenue and, as at December 31, 2017, has an accumulated deficit of $15,749,490 and working capital of $403,828. The Company will be required to raise additional capital in order to complete the acquisitions of the property, plant and equipment and mineral property interests referred to in Note 5, conduct exploration and development activities on its mineral property interests and maintain operations. These conditions raise significant doubt about the Company's ability to continue as a going concern. There can be no assurances that the Company will be able to obtain additional financial resources necessary and/or achieve profitability or positive cash flows. If the Company is unable to obtain adequate additional financing the Company will be required to curtail operations, exploration and development activities and there would be significant uncertainty whether the Company would continue as a going concern and realize its assets and settle its liabilities and commitments in the normal course of business.

These condensed consolidated interim financial statements do not reflect any adjustments, which could be material to the carrying values of assets and liabilities, which may be required should the Company be unable to continue as a going concern.

2. Basis of Preparation

Statement of Compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting* ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"), and its interpretations, using accounting policies consistent with International Financial Reporting Standards ("IFRS"). The condensed consolidated interim financial statements should be read in conjunction with the annual financial statements for the year ended March 31, 2017, which have been prepared in accordance with IFRS as issued by the IASB and interpretations of the IFRS Interpretations Committee ("IFRIC"). The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company's consolidated financial statements for the year ended March 31, 2017.

Basis of Measurement

The Company's consolidated financial statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and financial liabilities to fair value. The condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise stated.

Comparative Figures

Certain of the prior period's comparative figures have been reclassified to conform with the current period's presentation.

Subsidiaries are all entities over which the Company is able, directly or indirectly, to control financial and operating policies, which is the authority usually connected with holding majority voting rights. Subsidiaries are fully consolidated from the date on which control is acquired by the Company. Inter-company transactions and balances are eliminated upon consolidation. They are de-consolidated from the date that control by the Company ceases. As at December 31, 2017 the subsidiaries of the Company were:

	2017	2016
Risk-free interest rate	0.82%	0.52% - 0.80%
Estimated volatility	169.23% - 172.16%	169.49% - 180.37%
Expected life	3 years	3 years - 4 years

Estimated forfeiture rate	0%	0%

The weighted average fair value of all share options granted during the nine months ended December 31, 2017 was $0.31 (2016 - $0.20) per option.

Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide a reliable measure of the fair value of the Company's share options.

A summary of the Company's share options at December 31, 2017 and 2016 and the changes for the nine months ended on those dates, is as follows:

8. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following five categories: fair value through profit or loss ("FVTPL"); held-to-maturity investments; loans and receivables; available-for-sale and other financial liabilities. The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	**Category**	**December 31, 2017 $**	**March 31, 2017 $**
Cash	FVTPL	588,199	341,323
Amounts receivable	Loans and receivables	10,633	4,233
Accounts payable and accrued liabilities	Other financial liabilities	(323,818)	(546,161)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for amounts receivable and accounts payable and accrued liabilities approximate their fair value due to their short-term nature. The Company's fair value of cash under the fair value hierarchy is measured using Level 1 inputs.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash and amounts receivable is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

8. Financial Instruments and Risk Management (continued)

	Contractual Maturity Analysis at December 31, 2017				
	Less than 3 Months $	3 - 12 Months $	1 - 5 Years $	Over 5 Years $	Total $
Cash	588,199	-	-	-	588,199
Amounts receivable	10,633	-	-	-	10,633
Accounts payable and accrued liabilities	323,818	-	-	-	323,818

	Contractual Maturity Analysis at March 31, 2017				
	Less than 3 Months $	3 - 12 Months $	1 - 5 Years $	Over 5 Years $	Total $
Cash	341,323	-	-	-	341,323
Amounts receivable	4,233	-	-	-	4,233
Accounts payable and accrued liabilities	(546,161)	-	-	-	(546,161)

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

(b) Foreign Currency Risk

The Company's functional currency is the Canadian dollar and major transactions are transacted in Canadian Dollars, US Dollars and Euros. The Company maintains Euros bank accounts in Kosovo and a US Dollar bank account with its Canadian bank to support the cash needs of its foreign operations. Management believes the foreign exchange risk related to currency conversions is minimal and therefore does not hedge its foreign exchange risk. At December 31, 2017, 1 Canadian Dollar was equal to 0.66 Euro and 0.80 US Dollar.

Balances are as follows:

	Euros	US Dollars	CDN $ Equivalent
Cash	14,332	90,515	104,847
Accounts payable and accrued liabilities	-	16,499	(20,591)
	14,332	107,014	84,256

Based on the net exposures as of December 31, 2017 and, assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the Euro and US Dollar would result in an increase or decrease of approximately $9,268.

(Unaudited - Expressed in Canadian Dollars)

8. Financial Instruments and Risk Management (continued)

(c) Commodity Price Risk

Commodity price risk is the risk of financial loss resulting from movements in the price of the Company's commodity inputs and outputs. The Company's risk relates primarily to the expected output to be produced at its exploration and evaluation assets described in Note 5 of these condensed consolidated interim financial statements, which production is not expected in the near future.

Capital Management

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern such that it can provide returns for shareholders and benefits for other stakeholders. The Company considers the items included in shareholders' equity as capital. The management of the capital structure is based on the funds available to the Company in order to support the acquisition, exploration and development of mineral properties and to maintain the Company in good standing with the various regulatory authorities. In order to maintain or adjust its capital structure, the Company may issue new shares, sell assets to settle liabilities or return capital to its shareholders.

The properties in which the Company currently has an interest are in the exploration stage, as such, the Company does not recognize revenue from its exploration properties. The Company's historical sources of capital have consisted of the sale of equity securities and interest income. In order for the Company to carry out planned exploration and development and pay for administrative costs, the Company will spend its working capital and expects to raise additional amounts externally as needed.

There were no changes in the Company's management of capital during the nine months ended December 31, 2017.
